

A Vaccination Story

Leverage Technology to
Expand Your Vaccine’s Reach

EMPOWER PHARMACISTS

Positively impacting immunization rates
protects communities from infectious diseases.
See how technology helps the story unfold.

A Patient Walks Into a Pharmacy for a Vaccination

XiFin® Empower CareALERTS® combines one of the pharmacy industry’s most robust immunization databases with proprietary data mining to deliver prompts that are patient- and vaccine-specific.

DATA THAT FUELS CareALERTS

- Medical Claims Data
- CMS Direct Connection
- 56 State and Jurisdictional Immunization Registries
- Advisory Committee on Immunization Practices (ACIP) and the Center for Disease Control (CDC)

The Pharmacist Leverages Workflow to Submit a Vaccination Claim

Empower CareALERTS streamlines the pharmacy workflow by using the pharmacy management system (PMS) or [billing system](#) to notify pharmacists of their patient’s clinical and financial eligibility for a vaccine.

Co-Administered Vaccine Opportunity Identified!

Empower CareALERTS deploys targeted, in-workflow alerts for patients who are clinically eligible for co-administered or companion vaccines.

The Pharmacist Receives an Immediate Response for Vaccine Opportunities

The sophisticated rules engine in Empower CareALERTS considers clinical eligibility, financial coverage, and business requirements to help pharmacists identify prospective patients in real-time at the point of sale.

The New Immunization Is Recommended and Both Vaccines Are Administered

Empower CareALERTS is a purpose-built technology designed to facilitate the time-sensitive and accuracy-dependent process of determining vaccination eligibility in pharmacies, maximizing immunization opportunities for both scheduled appointments and walk-ins.

Significantly enhance the reach of your vaccines with the combination of **XiFin Empower CareALERTS** and our extensive network of thousands of participating pharmacies.
